

2017** CHEVALIER FBL 230 MC cnc turning center

Swing.....21.6"

Machining Length.....12.7"

Chuck Size..... 8"

Bar Capacity.....2.04"

Power.....20 hp

Max RPM.....3,500 RPM

Control..... CNC (FANUC 0i-T)

** Machine Sold New in 2018

The FBL-230 and 230MC with live tooling features a 45°, slant-bed, rigid box ways structure. Its ribbed Meehanite cast-iron mono-blocking foundation is designed to provide strong support and damping absorption, which helps resist deflection and vibration during heavy machining.

The FBL-230 and 230MC is engineered with ease of access and trouble-free maintenance in mind. Its compact design minimizes floor space. It is suitable for mixed volume, short-run or dedicated high-volume applications.
